

WVD1500-2

The polyform 1500 has established a standard and reputation in industrial use that has stood the test of time with production now in its 20th year.

Twinflo'

First and foremost you have a two-motored Structofoam power head to the full Twinflo' performance specification.

The giant container has a capacity of 70 litres (dry) and is carried on our stainless steel big wheel chassis and provision for emptying is by a standard dump hose facility.

The 1500 has always been very popular in the dairy and food preparation industries where the use of high pressure cleaning processes are commonplace resulting in a lot of water needing collecting nearly all of the time.

Nothing to rust, nothing to dent or scratch and a strong set of 38mm (1½") stainless steel and Structofoam accessories to match.

| Motor | Power | Airflow | Suction | Wet | Range | Weight | Size |
|-------|--------------------|----------|---------|-----|-------|--------|----------------------|
| 2400W | 230V AC 50/60Hz | 80 L/sec | 2500mm | 50L | 26.8m | 26.2Kg | 640 x 530 x 970mm |
